Cayman Islands

- The Country Risk Tier (CRT) reflects A.M. Best’s assessment of three categories of risk: Economic, Political and Financial System Risk.

- Cayman Islands, a CRT-2 country, is a Dependent Territory of the United Kingdom.

- Cayman is home to the largest offshore banking center in the world with almost 300 banks and the second largest captive insurance domicile in the world behind Bermuda.

- The map below depicts the countries A.M Best evaluates in North America, Latin America and the Caribbean. Economic performance in the region over the course of 2008 and 2009 echoes that of the United States in the form of decreased tourism revenues, slumping financial services sectors, and sharp reduction in overseas remittances. The region is expected to recover in 2010 but countries most vulnerable to a prolonged contraction are those in CRT-4 and CRT-5.

CRT 1 2 3 4 5

Regional Summary: Caribbean

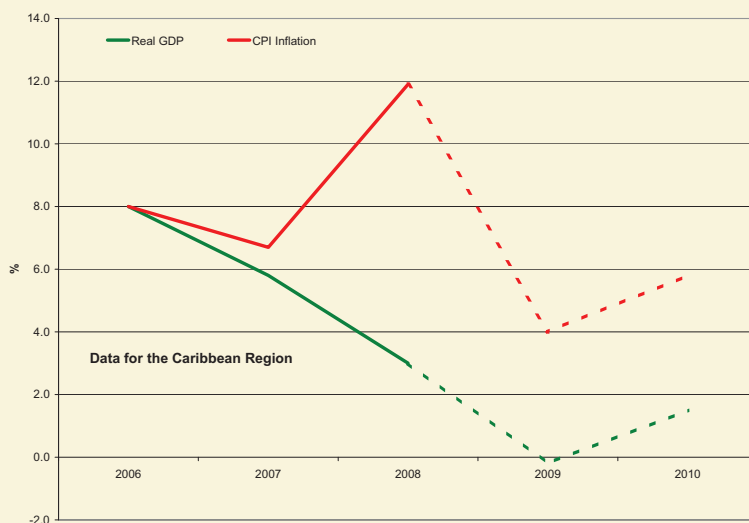

- The countries of the Caribbean vary in cultural origin, economic foundation and population affluence. However, in all cases, their long-term growth and stability is highly dependent upon their larger regional neighbors.
- As much of the Caribbean relies upon tourism revenues from nationals of developed countries, particularly the United States, economic growth is suffering in 2009.
- The Caribbean financial services sectors will be affected by the current global financial crisis. The exact impact is yet to be determined as the trend of nationalizations and consolidations in finance companies and the collapsing of hedge funds continues.

Economic Risk: Low

- The population of the Cayman Islands is small and affluent, with one of the highest standards of living in the world with a gross domestic product (GDP) per capita of USD 57,222.
- As the Cayman economy depends heavily on financial services and tourism industries, particularly those in the United States, growth is expected to decrease sharply in 2009 and contract slightly, but recover in 2010.

Vital Statistics 2007		
Nominal GDP	USD bn	2.701
Population	mil	0.05
GDP Per Capita	USD	57,222
Real GDP Growth	%	3.8
Inflation Rate	%	3.6
Premiums Written (Life)	USD mil	68
Premiums Written (Non-Life)	USD mil	30
Premiums Growth (06-07)	%	12.0

Political Risk Summary

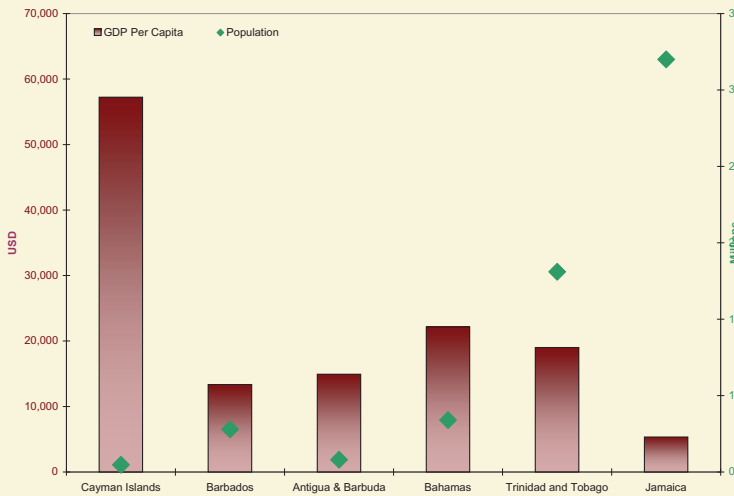

Score 1 (best) to 5 (worst)

Source: A.M. Best

Political Risk: Low

- As a self-governing British Overseas Territory, the Cayman Islands are closely linked to the United Kingdom in political and legal matters.
- As a tax haven, fiscal revenues are derived from import duties, registration fees and other royalties and taxes. The currency is pegged to the US dollar.
- At present, the legal and political relationship with the UK is under review by the local government.

Source: IMF and A.M. Best

Financial System Risk: Low

- The Cayman Islands Monetary Authority is the insurance regulator.
- The Cayman Islands is the second largest captive domicile in the world in terms of number of captives, and leads the world as a healthcare captive insurance center.
- Heavily reliant on the financial services industry, the Cayman leadership works to ensure a favorable business environment.

GUIDE TO BEST'S COUNTRY RISK TIERS

A.M. Best defines country risk as the risk that country-specific factors could adversely affect the claims paying ability of an insurer. Country risk is evaluated and factored into all Best's Credit Ratings. Countries are placed into one of five tiers, ranging from "CRT-1" (Country Risk Tier 1), denoting a stable environment with the least amount of risk, to "CRT-5" (Country Risk Tier 5) for countries that pose the most risk and, therefore, the greatest challenge to an insurer's financial stability, strength and performance.

A.M. Best's Country Risk Tiers are not credit ratings and are not directly comparable to a sovereign debt rating, which evaluates the ability and willingness of a government to service its debt obligations.

Country Risk Tiers

Country Risk Tier	Definition
CRT-1	Predictable and transparent legal environment, legal system and business infrastructure; sophisticated financial system regulation with deep capital markets; mature insurance industry framework.
CRT-2	Predictable and transparent legal environment, legal system and business infrastructure; sufficient financial system regulation; mature insurance industry framework.
CRT-3	Developing legal environment, legal system and business environment with developing capital markets; developing insurance regulatory structure.
CRT-4	Relatively unpredictable and nontransparent political, legal and business environment with underdeveloped capital markets; partially to fully inadequate regulatory structure.
CRT-5	Unpredictable and opaque political, legal and business environment with limited or nonexistent capital markets; low human development and social instability; nascent insurance industry.

Country Risk Reports

A.M. Best Country Risk Reports are designed to provide a brief, high level, explanation of some of the key factors that determine a country's Country Risk Tier assignment. It is not intended to summarize A.M. Best's opinion on any particular insurance market, or the prospects for that market.

Categories of Risk

Country Risk Reports provide "scores" for three categories of risk for each country. These "scores" are: (1) Very Low; (2) Low; (3) Moderate; (4) High and (5) Very High.

Category of Risk	Definition
Economic Risk	The likelihood that fundamental weaknesses in a country's economy will cause adverse developments for an insurer. A.M. Best's assessment of economic risk evaluates the state of the domestic economy, government finances and international transactions, as well as prospects for growth and stability.
Political Risk	The likelihood that government or bureaucratic inefficiencies, societal tensions, inadequate legal system or international tensions will cause adverse developments for an insurer. Political risk comprises the stability of the government and society, the effectiveness of international diplomatic relationships, the reliability and integrity of the legal system and of the business infrastructure, the efficiency of the government bureaucracy and the appropriateness and effectiveness of the government's economic policies.
Financial System Risk	Financial system risk (which includes both insurance and non-insurance financial system risk) is the risk that financial volatility may erupts due to inadequate reporting standards, weak banking system or asset markets and/or poor regulatory structure. Along with the risk that the insurance industry's level of development and public awareness, transparent and effective regulation and reporting standards and sophisticated regulatory body will contribute to a volatile financial system and compromise the ability of an insurer to pay claims.

Political Risk Summary

To provide additional detail on the political risk in a given domicile the Country Risk Reports include the Political Risk Summary. The Political Risk Summary is a radar chart that displays scores for nine different aspects of political risk scored on a scale of 1-5 with 1 being the least amount of risk and 5 being the highest amount of risk.

Category	Definition
International Transactions Policy	Measures the effectiveness of the exchange rate regime and currency management.
Monetary Policy	Measures the ability of a country to effectively implement monetary policy.
Fiscal Policy	Measures the ability of a country to effectively implement fiscal policy.
Business Environment	Measures the overall quality of the business environment, and ease of doing business.
Labor Flexibility	Measures the flexibility of the labor market, including the company's ability to hire and fire employees.
Government Stability	Measures the degree of stability in a government.
Social Stability	Measures the degree of social stability including human development and political rights.
Regional Stability	Measures the degree of stability in the region
Legal System	Measures the transparency and level of corruption in the legal system.

Country Risk Tier Disclosure

A Country Risk Tier (CRT) is not a credit rating, rather it represents a component of A.M. Best's credit rating methodology that is applied to all insurers. A CRT is not a recommendation to purchase, hold or terminate any security, insurance policy, contract or any other financial obligation issued by a government, an insurer or other rated issuer, nor do they address the suitability of any particular policy, contract or other financial obligation for a specific purpose or purchaser.

Financial Strength Ratings are distributed via press release and/or the A.M. Best Web site at www.ambest.com and are published in the *Rating Actions* section of *BestWeek*®. Financial Strength Ratings are proprietary and may not be reproduced without permission.
