Singapore

- The Country Risk Tier (CRT) reflects A.M. Best's assessment of three categories of risk: Economic, Political and Financial System Risk.

- Singapore has relatively low levels of economic, political and financial system risk. A.M. Best considers the majority of countries in Southeast Asia to be categorized as CRT-3 or CRT-4. The exceptions are Vietnam, the sole CRT-5, and Singapore the sole CRT-1.

- Singapore has been hit hard by the global financial turmoil that began in 2008. Singapore's economy is in a very severe recession and real gross domestic product (GDP) is expected to contract by 10% in 2009. The contraction will moderate significantly in 2010 but Singapore's economy is not expected to return to positive growth until 2011.

CRT 1 2 3 4 5

Regional Summary: Southeast Asia

- Southeast Asia is a critical part of the world trading system and while the region’s economies remain somewhat dependent on agriculture, manufacturing and services have been the engine for growth.
- 2009-2010 are forecasted to be very difficult times for the region. In fact forecasts suggest these should be the worst years since the Asian financial crisis in 1997-1998. With the economies of their large trading partners slowing significantly (notably U.S. and Europe) demand for exports is plummeting and leading to economic contraction across the region. At the same time as global credit tightens, the amount of foreign direct investment flowing into the economies is drying up.

Economic Risk: Low

- Singapore, a city-state, is a regional business center, reliant upon international commerce for economic growth and upon its regional neighbors for essential commodities.
- The country’s integration into the global economy has made Singapore susceptible to the current global slowdown.
- Singapore’s economy is in a recession as growth decelerated from nearly 8% in 2007 to around 1% in 2008 and will contract in 2009 and 2010.

Vital Statistics 2008		
Nominal GDP	USD bn	181.94
Population	mil	4.7
GDP Per Capita	USD	38,972
Real GDP Growth	%	1.2
Inflation Rate	%	6.5
Premiums Written (Life)	USD mil	11,445
Premiums Written (Non-Life)	USD mil	5,083
Premiums Growth (07-08)	%	16.0

Political Risk Summary

Score 1 (best) to 5 (worst)

Source: A.M. Best

Political Risk: Low

- The Singapore government is dominated by a single party, the PAP. The PAP has been in power since 1959, and despite its long, unopposed rule, it is generally regarded as efficient and has created stable political and economic environments.
- Singapore boasts an efficient capital market, and actively facilitates the free flow of financial resources.
- The World Bank ranked Singapore as #1 in its Doing Business program for ease of doing business.

Source: IMF and A.M. Best

Financial System Risk: Very Low

- Singapore’s regulatory authority is the Insurance Commissioner of the Monetary Authority of Singapore.
- The government, however, still plays a significant role in the economy and government linked companies are still popular and influential.

GUIDE TO BEST'S COUNTRY RISK TIERS

A.M. Best defines country risk as the risk that country-specific factors could adversely affect the claims paying ability of an insurer. Country risk is evaluated and factored into all Best's Credit Ratings. Countries are placed into one of five tiers, ranging from "CRT-1" (Country Risk Tier 1), denoting a stable environment with the least amount of risk, to "CRT-5" (Country Risk Tier 5) for countries that pose the most risk and, therefore, the greatest challenge to an insurer's financial stability, strength and performance.

A.M. Best's Country Risk Tiers are not credit ratings and are not directly comparable to a sovereign debt rating, which evaluates the ability and willingness of a government to service its debt obligations.

Country Risk Tiers

Country Risk Tier	Definition
CRT-1	Predictable and transparent legal environment, legal system and business infrastructure; sophisticated financial system regulation with deep capital markets; mature insurance industry framework.
CRT-2	Predictable and transparent legal environment, legal system and business infrastructure; sufficient financial system regulation; mature insurance industry framework.
CRT-3	Developing legal environment, legal system and business environment with developing capital markets; developing insurance regulatory structure.
CRT-4	Relatively unpredictable and nontransparent political, legal and business environment with underdeveloped capital markets; partially to fully inadequate regulatory structure.
CRT-5	Unpredictable and opaque political, legal and business environment with limited or nonexistent capital markets; low human development and social instability; nascent insurance industry.

Country Risk Reports

A.M. Best Country Risk Reports are designed to provide a brief, high level, explanation of some of the key factors that determine a country's Country Risk Tier assignment. It is not intended to summarize A.M. Best's opinion on any particular insurance market, or the prospects for that market.

Categories of Risk

Country Risk Reports provide "scores" for three categories of risk for each country. These "scores" are: (1) Very Low; (2) Low; (3) Moderate; (4) High and (5) Very High.

Category of Risk	Definition
Economic Risk	The likelihood that fundamental weaknesses in a country's economy will cause adverse developments for an insurer. A.M. Best's assessment of economic risk evaluates the state of the domestic economy, government finances and international transactions, as well as prospects for growth and stability.
Political Risk	The likelihood that government or bureaucratic inefficiencies, societal tensions, inadequate legal system or international tensions will cause adverse developments for an insurer. Political risk comprises the stability of the government and society, the effectiveness of international diplomatic relationships, the reliability and integrity of the legal system and of the business infrastructure, the efficiency of the government bureaucracy and the appropriateness and effectiveness of the government's economic policies.
Financial System Risk	Financial system risk (which includes both insurance and non-insurance financial system risk) is the risk that financial volatility may erupt due to inadequate reporting standards, weak banking system or asset markets and/or poor regulatory structure. Along with the risk that the insurance industry's level of development and public awareness, transparent and effective regulation and reporting standards and sophisticated regulatory body will contribute to a volatile financial system and compromise the ability of an insurer to pay claims.

Political Risk Summary

To provide additional detail on the political risk in a given domicile the Country Risk Reports include the Political Risk Summary. The Political Risk Summary is a radar chart that displays scores for nine different aspects of political risk scored on a scale of 1-5 with 1 being the least amount of risk and 5 being the highest amount of risk.

Category	Definition
International Transactions Policy	Measures the effectiveness of the exchange rate regime and currency management.
Monetary Policy	Measures the ability of a country to effectively implement monetary policy.
Fiscal Policy	Measures the ability of a country to effectively implement fiscal policy.
Business Environment	Measures the overall quality of the business environment, and ease of doing business.
Labor Flexibility	Measures the flexibility of the labor market, including the company's ability to hire and fire employees.
Government Stability	Measures the degree of stability in a government.
Social Stability	Measures the degree of social stability including human development and political rights.
Regional Stability	Measures the degree of stability in the region
Legal System	Measures the transparency and level of corruption in the legal system.

Country Risk Tier Disclosure

A Country Risk Tier (CRT) is not a credit rating, rather it represents a component of A.M. Best's credit rating methodology that is applied to all insurers. A CRT is not a recommendation to purchase, hold or terminate any security, insurance policy, contract or any other financial obligation issued by a government, an insurer or other rated issuer, nor do they address the suitability of any particular policy, contract or other financial obligation for a specific purpose or purchaser.

Financial Strength Ratings are distributed via press release and/or the A.M. Best Web site at www.ambest.com and are published in the *Rating Actions* section of *BestWeek*®. Financial Strength Ratings are proprietary and may not be reproduced without permission.
