Turkey

- The Country Risk Tier (CRT) reflects A.M. Best’s assessment of three categories of risk: Economic, Political and Financial System Risk.

- Turkey has high levels of political and financial system risk. The vast majority of countries in the Middle East & Northern Africa region are either CRT-3 or CRT-4.

- In 2009 the Turkish economy is experiencing a sharp decline in economic growth with the economy contracting by more than 5%. The bottom of the cycle is forecasted for 2010 as the economy is expecting to grow a modest 1% for 2010.

- Historically inflation has been high and volatile in turkey. In 2007 inflation hit a 30 year low of just over 8%, but in 2008 inflation once again was in the double digits. The global economic slowdown, along with lower world commodity prices should slow inflation.

CRT 1 2 3 4 5

Regional Summary: Middle East & North Africa

- The Middle East & North Africa region includes several wealthy oil producing nations and is characterized by regional instability and periods of regional violence.
- After more than five years of rapid expansion, driven primarily by a boom in oil prices, the outlook for the Middle East & North Africa region has become more pessimistic.
- With the World Bank forecasting oil prices to remain below their peak levels for the foreseeable future, the region will continue to face economic challenges.
- In addition to falling oil prices, the global economic slowdown has impacted the region through reduced tourism and tightening credit conditions.

Economic Risk: Moderate

- Turkey’s economy is based on agriculture and light manufacturing such as textiles and clothing.
- The economy has experienced erratic growth over the last few years due to a weak banking system, large current account deficits, and a lack of structural reforms.
- The Turkish economy is experiencing an economic recession. The economic reforms and improved regulation adopted over the past several years will be tested to see if the country can make it through a downturn and avoid an economic crisis.

Vital Statistics 2008		
Nominal GDP	USD bn	729.44
Population	mil	69.7
GDP Per Capita	USD	10,472
Real GDP Growth	%	1.1
Inflation Rate	%	10.4
Premiums Written (Life)	USD mil	1,126
Premiums Written (Non-Life)	USD mil	7,682
Premiums Growth (07-08)	%	7.1

Political Risk Summary

Score 1 (best) to 5 (worst)

Source: A.M. Best

Political Risk: High

- Situated between the Middle East and Europe, Turkey’s population represents a mixture of Eastern and Western cultures.
- Turkey seeks membership in the European Union (EU) and while talks have commenced some strong opposition among current EU membership suggests that accession will most likely not occur in the near term. Issues such as the status of Kurds in Turkey and the political treatment of Cyprus will negatively impact Turkey’s prospects of EU membership.

Source: IMF and A.M. Best

Financial System Risk: High

- The Insurance Supervisory Office is the primary insurance regulator in Turkey.
- Overall regulation of Turkey’s financial system has been improving substantially over the past 5 years as they attempt to implement reform to conform to European standards.

GUIDE TO BEST'S COUNTRY RISK TIERS

A.M. Best defines country risk as the risk that country-specific factors could adversely affect the claims paying ability of an insurer. Country risk is evaluated and factored into all Best's Credit Ratings. Countries are placed into one of five tiers, ranging from "CRT-1" (Country Risk Tier 1), denoting a stable environment with the least amount of risk, to "CRT-5" (Country Risk Tier 5) for countries that pose the most risk and, therefore, the greatest challenge to an insurer's financial stability, strength and performance.

A.M. Best's Country Risk Tiers are not credit ratings and are not directly comparable to a sovereign debt rating, which evaluates the ability and willingness of a government to service its debt obligations.

Country Risk Tiers

Country Risk Tier	Definition
CRT-1	Predictable and transparent legal environment, legal system and business infrastructure; sophisticated financial system regulation with deep capital markets; mature insurance industry framework.
CRT-2	Predictable and transparent legal environment, legal system and business infrastructure; sufficient financial system regulation; mature insurance industry framework.
CRT-3	Developing legal environment, legal system and business environment with developing capital markets; developing insurance regulatory structure.
CRT-4	Relatively unpredictable and nontransparent political, legal and business environment with underdeveloped capital markets; partially to fully inadequate regulatory structure.
CRT-5	Unpredictable and opaque political, legal and business environment with limited or nonexistent capital markets; low human development and social instability; nascent insurance industry.

Country Risk Reports

A.M. Best Country Risk Reports are designed to provide a brief, high level, explanation of some of the key factors that determine a country's Country Risk Tier assignment. It is not intended to summarize A.M. Best's opinion on any particular insurance market, or the prospects for that market.

Categories of Risk

Country Risk Reports provide "scores" for three categories of risk for each country. These "scores" are: (1) Very Low; (2) Low; (3) Moderate; (4) High and (5) Very High.

Category of Risk	Definition
Economic Risk	The likelihood that fundamental weaknesses in a country's economy will cause adverse developments for an insurer. A.M. Best's assessment of economic risk evaluates the state of the domestic economy, government finances and international transactions, as well as prospects for growth and stability.
Political Risk	The likelihood that government or bureaucratic inefficiencies, societal tensions, inadequate legal system or international tensions will cause adverse developments for an insurer. Political risk comprises the stability of the government and society, the effectiveness of international diplomatic relationships, the reliability and integrity of the legal system and of the business infrastructure, the efficiency of the government bureaucracy and the appropriateness and effectiveness of the government's economic policies.
Financial System Risk	Financial system risk (which includes both insurance and non-insurance financial system risk) is the risk that financial volatility may erupts due to inadequate reporting standards, weak banking system or asset markets and/or poor regulatory structure. Along with the risk that the insurance industry's level of development and public awareness, transparent and effective regulation and reporting standards and sophisticated regulatory body will contribute to a volatile financial system and compromise the ability of an insurer to pay claims.

Political Risk Summary

To provide additional detail on the political risk in a given domicile the Country Risk Reports include the Political Risk Summary. The Political Risk Summary is a radar chart that displays scores for nine different aspects of political risk scored on a scale of 1-5 with 1 being the least amount of risk and 5 being the highest amount of risk.

Category	Definition
International Transactions Policy	Measures the effectiveness of the exchange rate regime and currency management.
Monetary Policy	Measures the ability of a country to effectively implement monetary policy.
Fiscal Policy	Measures the ability of a country to effectively implement fiscal policy.
Business Environment	Measures the overall quality of the business environment, and ease of doing business.
Labor Flexibility	Measures the flexibility of the labor market, including the company's ability to hire and fire employees.
Government Stability	Measures the degree of stability in a government.
Social Stability	Measures the degree of social stability including human development and political rights.
Regional Stability	Measures the degree of stability in the region
Legal System	Measures the transparency and level of corruption in the legal system.

Country Risk Tier Disclosure

A Country Risk Tier (CRT) is not a credit rating, rather it represents a component of A.M. Best's credit rating methodology that is applied to all insurers. A CRT is not a recommendation to purchase, hold or terminate any security, insurance policy, contract or any other financial obligation issued by a government, an insurer or other rated issuer, nor do they address the suitability of any particular policy, contract or other financial obligation for a specific purpose or purchaser.

Financial Strength Ratings are distributed via press release and/or the A.M. Best Web site at www.ambest.com and are published in the *Rating Actions* section of *BestWeek*®. Financial Strength Ratings are proprietary and may not be reproduced without permission.
