Oman

- The Country Risk Tier (CRT) reflects A.M. Best's assessment of three categories of risk: Economic, Political and Financial System Risk.

- Oman is a CRT-3 country. All six nations that comprise the Gulf Cooperation Council (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and United Arab Emirates) are in CRT-3. The vast majority of countries in the Middle East & North-ern Africa region are either CRT-3 or CRT-4.

- While economic growth in Oman has picked up significantly since 2009 (1.1% in 2009, 4.2% in 2010, and an expected 4.4% in 2011), there are significant downside risks, given the slowing world economy and the social unrest in the region.

CRT 1 2 3 4 5

Regional Summary: Middle East & North Africa

- The Middle East & North Africa region includes several wealthy oil producing nations and is characterized by regional instability and periods of regional violence.
- Political uncertainty has increased significantly throughout the MENA region since the beginning of 2011, starting with the revolution in Tunisia.
- This social unrest has brought about a decline in investor confidence in much of the region. This decline in foreign investment has been somewhat offset in oil producing nations by the increase in the price of oil.

Economic Risk: Moderate

- Oman has the lowest gross domestic product (GDP) per capita in the GCC, comparable to that of Saudi Arabia.
- Oil revenue is the main driver of the economy, as it is the most important source of export earnings and government revenue.
- Oman is not a member of OPEC, unlike the other GCC states that depend heavily on the oil industry.

Vital Statistics 2010		
Nominal GDP	USD bn	55.62
Population	mil	3.0
GDP Per Capita	USD	18,657
Real GDP Growth	%	4.2

Political Risk Summary

Score 1 (best) to 5 (worst)

Source: A.M. Best

Political Risk: Moderate

- Oman is one of the six nations that make up the Gulf Cooperation Council (GCC). The GCC’s objectives include private sector cooperation, formulating consistent regulatory environments and, at some point, establishing a common currency.
- There were some protests calling for political reform in Oman. However, compared to other countries in the region, the disruptions were mild.
- Oman is an absolute monarchy and has no constitution. In 1996, the Sultan issued the “Basic Statute” that defined the law of succession. However, there is still a great deal of uncertainty surrounding the issue of succession, which poses considerable political risk.

Source: IMF and A.M. Best

Financial System Risk: Moderate

- The Capital Market Authority is responsible for supervision of the insurance industry.
- The Muscat Securities Market is active and, unlike many equity markets in the region, is open to foreign investors.

GUIDE TO BEST'S COUNTRY RISK TIERS

A.M. Best defines country risk as the risk that country-specific factors could adversely affect the claims paying ability of an insurer. Country risk is evaluated and factored into all Best's Credit Ratings. Countries are placed into one of five tiers, ranging from "CRT-1" (Country Risk Tier 1), denoting a stable environment with the least amount of risk, to "CRT-5" (Country Risk Tier 5) for countries that pose the most risk and, therefore, the greatest challenge to an insurer's financial stability, strength and performance.

A.M. Best's Country Risk Tiers are not credit ratings and are not directly comparable to a sovereign debt rating, which evaluates the ability and willingness of a government to service its debt obligations.

Country Risk Tiers

Country Risk Tier	Definition
CRT-1	Predictable and transparent legal environment, legal system and business infrastructure; sophisticated financial system regulation with deep capital markets; mature insurance industry framework.
CRT-2	Predictable and transparent legal environment, legal system and business infrastructure; sufficient financial system regulation; mature insurance industry framework.
CRT-3	Developing legal environment, legal system and business environment with developing capital markets; developing insurance regulatory structure.
CRT-4	Relatively unpredictable and nontransparent political, legal and business environment with underdeveloped capital markets; partially to fully inadequate regulatory structure.
CRT-5	Unpredictable and opaque political, legal and business environment with limited or nonexistent capital markets; low human development and social instability; nascent insurance industry.

Country Risk Reports

A.M. Best Country Risk Reports are designed to provide a brief, high level, explanation of some of the key factors that determine a country's Country Risk Tier assignment. It is not intended to summarize A.M. Best's opinion on any particular insurance market, or the prospects for that market.

Categories of Risk

Country Risk Reports provide "scores" for three categories of risk for each country. These "scores" are: (1) Very Low; (2) Low; (3) Moderate; (4) High and (5) Very High.

Category of Risk	Definition
Economic Risk	The likelihood that fundamental weaknesses in a country's economy will cause adverse developments for an insurer. A.M. Best's assessment of economic risk evaluates the state of the domestic economy, government finances and international transactions, as well as prospects for growth and stability.
Political Risk	The likelihood that government or bureaucratic inefficiencies, societal tensions, inadequate legal system or international tensions will cause adverse developments for an insurer. Political risk comprises the stability of the government and society, the effectiveness of international diplomatic relationships, the reliability and integrity of the legal system and of the business infrastructure, the efficiency of the government bureaucracy and the appropriateness and effectiveness of the government's economic policies.
Financial System Risk	Financial system risk (which includes both insurance and non-insurance financial system risk) is the risk that financial volatility may erupt due to inadequate reporting standards, weak banking system or asset markets and/or poor regulatory structure. Along with the risk that the insurance industry's level of development and public awareness, transparent and effective regulation and reporting standards and sophisticated regulatory body will contribute to a volatile financial system and compromise the ability of an insurer to pay claims.

Political Risk Summary

To provide additional detail on the political risk in a given domicile the Country Risk Reports include the Political Risk Summary. The Political Risk Summary is a radar chart that displays scores for nine different aspects of political risk scored on a scale of 1-5 with 1 being the least amount of risk and 5 being the highest amount of risk.

Category	Definition
International Transactions Policy	Measures the effectiveness of the exchange rate regime and currency management.
Monetary Policy	Measures the ability of a country to effectively implement monetary policy.
Fiscal Policy	Measures the ability of a country to effectively implement fiscal policy.
Business Environment	Measures the overall quality of the business environment, and ease of doing business.
Labor Flexibility	Measures the flexibility of the labor market, including the company's ability to hire and fire employees.
Government Stability	Measures the degree of stability in a government.
Social Stability	Measures the degree of social stability including human development and political rights.
Regional Stability	Measures the degree of stability in the region
Legal System	Measures the transparency and level of corruption in the legal system.

Country Risk Tier Disclosure

A Country Risk Tier (CRT) is not a credit rating, rather it represents a component of A.M. Best's credit rating methodology that is applied to all insurers. A CRT is not a recommendation to purchase, hold or terminate any security, insurance policy, contract or any other financial obligation issued by a government, an insurer or other rated issuer, nor do they address the suitability of any particular policy, contract or other financial obligation for a specific purpose or purchaser.

Financial Strength Ratings are distributed via press release and/or the A.M. Best Web site at www.ambest.com and are published in the *Rating Actions* section of *BestWeek*®. Financial Strength Ratings are proprietary and may not be reproduced without permission.
